Competed for South Africa at the World Orienteering Championships in 2019 in Norway

PROFILE

Creative and passionate web developer inspired by the possibilities that the ever changing tech industry allow. I have a strong drive to constantly develop myself and enhance my abilities. With the goal to be able to provide dynamic solutions to build applications that are innovative and user experience driven.

Gaining a degree in Actuarial Science has given me a firm base and understanding of risk, mathematics, statistics and probability and taught me how these complex subjects interlink. This background has allowed me to merge these concepts with software development experience and enhance my problem solving ability using both of these skill sets.

★ RELEVANT EXPERIENCE

Design and Development of a website for an Independent Artist, Madrid
March 2020 — June 2020

I worked with an independent musician(Ariel McCleary) who has 280 000 subscribers on YouTube. The website was built using HTML, CSS, Javascript, Bootstrap, PHP. I also gained experience in using Google Analytics and Search Engine Optimisation.

Passport Pals, Johannesburg
July 2020 — August 2020

While abroad I found the different visa requirements for citizens from different countries very interesting. This interest led me to develop a website which scrapes and compares visa requirement data between countries. Any two people from two different countries can use the website to see which countries they can travel to visa free. The website was developed using Node.js, HTML, CSS, templating engine pug.js, express.js, MongoDB, Heroku, mongoose.js

🎓 EDUCATION

Bachelor of Science in Actuarial and Financial Mathematics, University of Pretoria, Pretoria
February 2012 — November 2017

💼 EMPLOYMENT HISTORY

English Teaching Assistant at IES Margarita Salas, Madrid
September 2018 — July 2020

Worked in a high school teaching English in Madrid, Spain. It was an amazing experience which gave me the opportunity to live and travel in Europe.

Mathematics and Sciences Tutor at Master Maths, Johannesburg
March 2018 — July 2018

Full time tutor at MasterMaths in Pineslopes. I tutored students in Mathematics, Life and Physical Sciences.
